Tree kits from several manufacturers

Various colors and textures of scenic foam

Various painted and weathered detail items

Various size mesh food strainers & tea

strainer

White glue diluted with equal parts water

Wire cutters

Woodland Scenics' green Poly Fiber

**COLOR MIXING CHART**

The earth colored paint used for this DVD is Pittsburgh # 3610 Poplar. Around the rocks I used a darker earth shade; Pittsburgh #7605 Tortoise. You'll also need flat black and white interior latex paint, liquid dish washing detergent, and several cheap 2" to 3" China bristle brushes.

- Wet water — 16-ounces water mixed with 1/2 teaspoon liquid detergent
- Matte medium adhesive — 1 part matte medium and 4 parts wet water
- Tar road — Mix 1 part flat black with 2 parts flat earth colored latex paint (which has been diluted with equal parts water). Thin with a little wet water if necessary.
- Dirt road — Mix equal parts flat earth colored latex paint and wet water.
- Ballast Weathering — For the center of the track mix 1 part flat black latex paint and 6 parts wet water. To weather along the edges of the track mix 1 part earth colored latex paint with 8 parts wet water.
